

Aaron enrolled in FSET with a primary goal of finding stable and full-time employment while contending with a justice involved background.

One of the very first things Aaron's FSET case manager, Jessica, did was assist him in acquiring appropriate interview clothes while also helping him navigate obtaining his driver's license. In addition, Jessica worked with Aaron to gather his work history, establish references, and created a resume together. Aaron also went through the process of obtaining a vehicle loan from another local community resource and lined up a reliable vehicle to ensure he could get to and from work on time.

Soon after, Aaron was ready to begin actively searching for a full-time stable job. He completed an application to Crystal Finishing after Jessica shared valuable employer information learned from the employer partnership between FSET and Crystal Finishing. Jessica helped him prepare for his interview and Megan, Career Services Specialist, sent a direct referral to Crystal Finishing, highlighting many positive aspects about Aaron.

As a result of Aaron's hard work and focus, he was hired at Crystal Finishing for a full-time position in their Extrusion department! FSET is continuing to support Aaron through his first 90 days of employment via one-on-one and financial support.
