### + Free Training

Training includes instructor-led delivery, virtual classes, and practical hands-on training to develop the skills necessary to be successful in a manufacturing and fabrication work environment. Topics include intro to math, shop math, intro to welding, interpreting engineering drawings, financial literacy, and manufacturing soft skills.

### + Earn 4 College Credits

Individuals will receive 4 transferrable credits by attending a total of 6 classes consisting of 162 total hours. The program will consist of 16 hours of class per week over a 10-week period.

### + Paid On-The-Job Training

Participants have the potential to work 20 hours per week of on-the-job training at a local employer, while getting paid!
